

KALPAK KANUNGO

Generative AI & Agentic AI Engineer

Phone: +91 8777651808 | Email: kanungokalpak@gmail.com | Location: Kolkata, India | www.linkedin.com/in/kanungokalpak

PROFESSIONAL SUMMARY

Engineer with **3+ years** of experience delivering validated enterprise QMS systems in pharmaceutical and life sciences, now focused on **Generative AI** and **Agentic AI** engineering. Has built hands-on **RAG** and **multi-agent** solutions that automate real support and operations workflows, and is **Claude Foundations certified (Anthropic)**. Combines **LLM**, **RAG**, and **agent orchestration** skills with deep **21 CFR Part 11** knowledge, bringing a compliance-first, audit-ready approach to AI. Looking to build production-grade GenAI and agentic AI solutions for enterprise and regulated environments.

CORE SKILLS

Generative AI & LLMs	Generative AI, Large Language Models (LLMs), Claude (Anthropic), Google Gemini, Prompt Engineering, Context Grounding
RAG & Retrieval	Retrieval-Augmented Generation (RAG), Document Ingestion & Parsing, Chunking Strategies, Embeddings, Sentence-Transformers, ChromaDB, Vector Databases, Semantic Search
Agentic AI	AI Agents, Multi-Agent Systems, Agent Orchestration, LangGraph, LangChain, Human-in-the-Loop Design
Integration & APIs	Python, AWS Bedrock, Oracle SQL
Enterprise QMS Platforms	TrackWise, ValGenesis VLMS

CERTIFICATIONS

- **Claude Certified Architect – Foundations**, Anthropic
- **Microsoft Certified: Azure Fundamentals (AZ-900)**
- **AWS Certified Cloud Practitioner**
- **Cognizant Vibe Code Hackathon**

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions, Kolkata, India **Sept 2023 – Present**

I. Generative AI & Agentic AI *May 2025 – Present*

- Delivered **2 GenAI and agentic AI systems** (RAG chatbot, agentic DS traceability pipeline) that cut support-ticket volume by **47%** and manual compliance-documentation effort — reducing operational overhead and risk across the QMS program.

II. TrackWise Developer *Dec 2023 – Present*

Project: Enterprise QMS Modernization Program | Client: Philips | Domain: Healthcare

- **Configuration & development:** Designed and customized **12+ TrackWise workflows** and business rules for the Complaint Handling module, aligned to client SOPs and compliant with **21 CFR Part 11**.
- **Requirements:** Led **20+ requirement workshops** with global business users and quality teams, with **zero requirement-change rework** after sign-off.
- **Validation (ValGenesis):** Managed the validation lifecycle for **3+ years**; authored and reviewed **10+ IQ / PIQ / MP documents** and led **IQ / PIQ execution** for multiple major releases with a **100% first-pass audit record**.
- **Testing, deployment & support:** Coordinated QA/UAT for 6+ feature deployments (**40+ defects** resolved before go-live); managed controlled Dev, QA, and Production releases with **zero unplanned downtime**; provided post-production support and upgrade work.

PROJECTS

Project 1: DS Traceability Copilot

Tech Stack: Python, LangGraph, Google Gemini, ChromaDB, Sentence-Transformers, Slack Bolt, FastAPI, Google Drive API

- Built a **multi-agent LangGraph pipeline** linking Slack user stories to **Design Specification (DS) IDs** in a **GxP-regulated** TrackWise complaint-handling document: a **matcher agent** (semantic search via ChromaDB + Sentence-Transformers), a **Gemini drafting agent** producing house-style DS entries when no match exists, and a **self-correction reviewer agent** that critiques and revises drafts before human review.
- **Business Impact:** Automated DS traceability mapping and drafting across **323 DS entries spanning 26 configuration families** in a GxP-regulated document, improving compliance accuracy and audit-readiness and removing manual cross-referencing effort.

Project 2: RAG-Based Support Chatbot for Business Users

Tech Stack: Python, RAG, Embeddings, Vector Database, LLM, Ollama, LangChain, Streamlit

- Built a **RAG chatbot** over the project's full documentation set (**SOPs, work instructions, Design Specifications, DF sheets**), with a **document ingestion, chunking, embedding, and retrieval pipeline** grounding responses in approved documents rather than the model's general knowledge.
- **Business Impact:** Reduced process-related support tickets by **47%**, cutting resolution time and freeing the support team for higher-value work.

EDUCATION

B.Tech, Computer Science and Technology, University of Engineering and Management, Kolkata

Graduated 2023

Julien Day School — ISC (83%), 2019 • ICSE (90%), 2017
